

INFERNO®

**HIGH
TEMPERATURE
ROUNDSLING**

sales@liftex.com | 1-800-290-0900

Working conditions within the lifting industry are continuously more challenging; many companies are even requested to lift with extremely high temperatures. Research, testing, and development in our factory, in close collaboration with our suppliers, have resulted in a huge step forward in our product range: Inferno®: the heat resistant soft sling.

Inferno®: The Heat Resistant Soft Sling

The ultra-heat resistant Inferno® soft sling makes it possible to lift heavy payloads when working under extreme heat conditions. Even when the temperature rises to 390°C, the Inferno® soft sling will maintain strength!

“Inferno®: Raising expectations with raising temperatures.”

Properties

The Inferno® soft sling is made of 100% Aramid and available from 2ft to 210ft, with a WLL up to 110,000lbs vertical. The color of the sling is yellow. For special requests up to 5,500lbs vertical, it is possible to produce the Inferno® sling in black.

Features

- ✓ **Maintains its strength up to 390°F(!)**
- ✓ **Easy to position**
- ✓ **Low D:d ratio**
- ✓ **Soft, lightweight, and easy to handle**
- ✓ **Improves workflow**
- ✓ **High abrasion resistance**
- ✓ **Environmentally friendly due to the long lifespan**
- ✓ **Creates safer lifting conditions**

Sustainability

The Inferno® heat-resistant soft sling jacket is repairable, making it a sustainable option. In case of damage to the jacket, it can be repaired, extending the lifespan of the sling and reducing waste.
